EQUILIBRIUM POOLS

LIFESTYLE-FOCUSSED DESIGN

AN EXCEPTIONAL BACKYARD ADDITION

Built by Equilibrium Pools, this 8m x 4m pool and 2.2m x 2m spa combination exudes elegance. Stunning blue-toned Bisazza tiles and Desigerite 90 per cent glass beadcrete beautifully complement the natural travertine coping, as well as the surrounding landscaping. Established by Regal Design Landscapes, the lush plant varieties around the pool achieve a harmonious colour palette for a sophisticated result.

Featuring a generous-sized ledge and entry steps, the pool is ideal for relaxation and socialising. Its close proximity to the alfresco area encourages a seamless integration of spaces, which is perfect for entertaining family and friends. With computerised touch-screen automation included, the homeowners can easily control the pool equipment and garden lighting.

By including a thermal pool cover that aids in heat retention and reduces water loss, as well as a water tank, and variable-speed pumps that are programmed to run at off-peak electricity times, Equilibrium Pools ensured the pool is environmentally sustainable.

Established in 2015 by Rob Rooney and Rourke Hartwig, Equilibrium Pools is renowned for its custom-designed and quality-built concrete pools. Servicing the north shores of Sydney, including the eastern suburbs, northern beaches and the Hills district, the company has extensive experience in managing projects of all scales, and is accustomed to tight-access sites.

Building and designing around 20 pools annually using computer-aided design (CAD) technology, the friendly team at Equilibrium Pools can also manage council approvals, and offer custom landscape design services, including working drawings, as well as council development application (DA) and compliant development certificate (CDC) plans.

Equilibrium Pools specialises in creating balanced lifestyle-focussed spaces for all its clients. To begin your new pool journey, contact the company today!
