## ENCHANTING ENVIRONS

This unique outdoor design by **Equilibrium Pools** is vibrant and user-friendly in equal measure.

The unique shape of this pool, which incorporates steps and a shallow swimming area, was specifically created to accommodate the needs of the homeowners' young family. The pool features an extra-deep end, which is perfect for diving, while the generous poolside space within the frameless-glass fencing ensures safety is prioritised without compromising on functionality or style.

The combination of rich 'Belgium Blue' limestone surrounds, glass mosaic Bisazza tiles at the waterline, and a Designerite Islands Beadcrete pool surface in 'Venezia' results in a dynamic appearance that is visually striking. The inclusion of lush green landscaping and multiple poolside seating arrangements further enhances the design, creating an ideal space for outdoor living and entertaining.

The team at Equilibrium Pools took a collaborative approach to the project, working closely with Peter Nixon of Paradisus Garden Design to achieve a seamless outcome. In particular, the careful selection of foliage, including sweet viburnum, alcantarea imperialis 'rubra', blue chalksticks and variegated cup of gold vine, ensured that the selected plant life would perfectly complement the outdoor styling, while also providing a vibrant visual backdrop along the property's boundary.

Established in 2015 by Rob Rooney and Rourke Hartwig, Equilibrium Pools is renowned for its custom-designed and quality-built concrete pools. Servicing Sydney's North Shore, Northern Beaches, Eastern suburbs and the Hills district, the company has extensive experience in managing projects of all scales, and is accustomed to tight-access sites.

Building and designing around 25 pools annually using computer-aided design (CAD) technology, the friendly team at Equilibrium Pools can also manage council approvals, and offer custom landscape design services, including working drawings, as well as council development application (DA) and compliant development certificate (CDC) plans.

Equilibrium Pools specialises in creating balanced lifestyle-focussed spaces for all its clients. Contact the company to begin your new pool journey.
